

Information Searcher

"The longest published newsletter in K-12 education designed specifically for professionals working to integrate technology into the curriculum and the library program --important for teachers and computer directors --a must for school librarians"

Published and edited by Pam Berger, a school librarian for 20 years, and a leader in educational technology, **Information Searcher** offers lively and relevant feature articles that explore current issues. Special columns include:

CyberSites, an annotated listing of current Websites focusing on a particular curriculum and/or topic.

Pipeline explores telecollaborative and interactive Websites and projects to encourage active learning.

The Stacks reviews the latest books on the Internet and other pertinent technology topics.

and more....

"A grassroots newsletter for practitioners. I read it cover to cover the minute I get it and then pass on the [Web]sites and ideas to my teachers. There is always something I can use immediately."
